

PAUD Melati 4 School Renovation in Bogor Nirwana Residence

PT Bakrieland Development Tbk (Bakrieland) through one of its business units Bogor Nirwana Residence (BNR), reimplemmented the school infrastructure improvement program as part of Corporate Social Responsibility (CSR) program. This time, Bakrieland choose PAUD Melati 4 School which has 20 students. The school was chosen based on its participation on the Bakrieland program called "Green Tree Challenge" where the students managed to keep the plants that Bakrieland entrusted in a certain period of time. In addition, the school location is also directly adjacent to the BNR and the building is used not only for early childhood but also Posyandu, TPA and community meetings.

The improvement of infrastructure for PAUD is divided into 2 stages. This stage is the first stage with the target of repairing critical things like the fragile roof. This program lead by Mr. Firman and Mr. Apip (Estate Management BNR). PAUD Melati 4 school principal thanked Bakrieland for the assistance and hoped that the good relationship between the two sides that had been established could continue through various CSR programs.

This program is part of Bakrieland Goes Green, especially Green Attitude with education pillars.
