Green Office Ergonomi in Bakrieland Holding

In order to continuously improve employee awareness on the environment, health and convenience of its office employees, PT Bakrieland Development Tbk (Bakrieland) on August 4, 2017 launched a new program called Green Office Ergonomi. The launch was held at Bakrieland Holding's office.

In accordance with the program's name, this time Bakrieland utilize ergonomics that studies human behavior in relation to work and the environment. This science seeks to provide solutions in adjusting tasks and task support equipment related with the condition of the human body through how the posture in performing tasks / jobs, cleanliness of the work environment, layout, lighting temperature, air circulation, and equipment design. The ultimate goal is to provide comfort to employees in order to be more productive and avoid employees from sickness due to the office environment.

The program is conducted by doing 3 activities, namely: a thorough assessment of the work space and personal aspects of employees, seminars on healthy living tips at the office, and consultation assessment results and provide specific treatment of body parts that are experiencing interference.

To realize this program, Bakrieland cooperates with PT. Jungleland Asia, one of Bakrieland's business unit under PT. Graha Andrasentra Propertindo Tbk (GAP). Specifically, one of the GAP Work Unit, Health Safety Environment (HSE), formulates program and become the speakers.

The Green Office Ergonomic Program is part of Bakrieland Goes Green (BGG), especially in Green Attitude with focus on Environment pilar.
