

School Park Program in Bogor Nirwana Residence

On Monday, November 21, 2016 which is the National Tree day, PT Bakrieland Development (Bakrieland) embodies Bakrieland Goes Green (BGG), specifically Green Attitude with the Environment pillar, through its business unit at Bogor Nirwana Residence. In this opportunities, Bakrieland implemented the School Park program at PAUD Mawar 3. The School Park Program is an effort of Bakrieland to educate young children by working together with schools in a simple way such as caring for plants. Schools and children are challenged to take care of the plants for a certain period of time. If the plants are successfully treated, the school and children get appreciation.

On this occasion, Mercu Buana University (UMB), which is running a Green program linked to the 9th Mercu Buana Festival during November also participated on Bakrieland's program. In this case UMB participates to provide plants for PAUD school.
