

School Renovation: PAUD Cempaka 2 School at Bogor Nirwana Residence

PT Bakrieland Development Tbk (Bakrieland) through one of their subsidiaries, PT. Graha Andrasentra Propertindo Tbk (GAP) that manages Bogor Nirwana Residence (BNR) returned to fix the school infrastructure in order to implement the CSR 'School Renovation' Program.

This time, the school that they are renovating is the PAUD Cempaka 2 School that teaches 20 or more students. PAUD, that was built by Aston Bogor, is chosen not only because of how close its location is with BNR but also because the building is used not only for PAUD but also for Posyandu and TPA. During this time, learning activities are disruptive due to the lack of quality of the existing infrastructure especially on the floor that are broken and heat from the sun that goes directly to the classroom in the morning. Because of this, the renovation of the infrastructure this time is focusing on fixing the floors and building a roof.

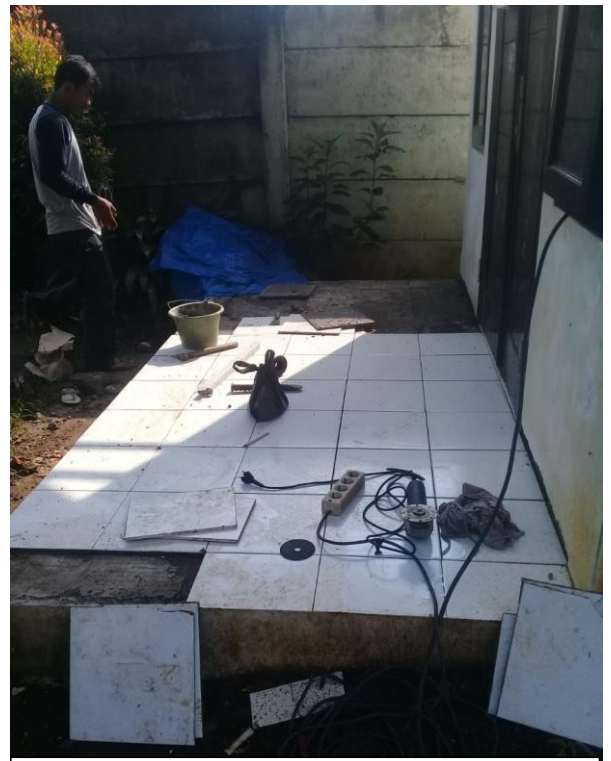

The revitalization of the school was coordinated by Mr. Firman and Mr. Apip (Estate Management BNR). At this opportunity, the principal of PAUD Cempaka 2 expressed their gratitude towards Bakrieland for all the help and hope that this program will improve the relationship between the two parties and can continue to be established through various corporation programs.

With the renovation of PAUD Cempaka 2's infrastructure, Bakrieland and its business units has conduted school rejuvenation totaling of 9 PAUD schools since launching the program.

For Bakrieland, this activity is an implementation of Corporate Sustainability for "It's About the People" pillar, specifically on the development of local communities in the education field.
